SIG TAPERED
FOAM WING
OR OZ PLAN
#16499

FULL SIZE DRAWINGS

WARNING-DANGER!

DO NOT FLY MODEL AIRPLANES NEAR ELECTRIC POWER LINES. INSTANT DEATH CAN RESULT FROM CONTACT WITH, OR FLYING TOO CLOSE TO, ELECTRIC POWER LINES.

WING AND TAIL ARE ZERO INCIDENCE
NO THRUST OFFSET WAS USED

No down thrust or right thrust was used on the prototype. The motor was mounted zero-zero with good results. If your personal preference is for offset, be certain to allow for this when mounting the cowling and fitting the spinner.

0-0 THRUST

— 1-3/4" SPINNER
(NOT FURNISHED)

A CABLE TYPE PUSHROD (NOT FURNISHED) SUCH AS THE SIG SH-559 IS RECOMMENDED FOR MOTOR THROTTLE HOOKUP
